

DIAMOND COATED EDGE FORMING ROUTERS

**Accurate profile -
fast cutting and long lasting.**

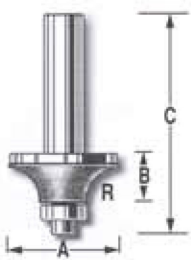

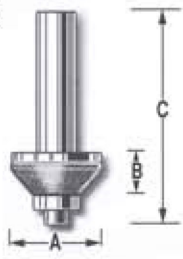

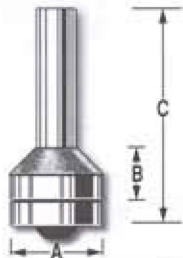

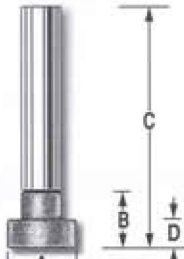

These tools are designed to be used on marble, granite, granite 90, fibreglass, ceramics, corian and some types of plastics, glass and graphite.

Tools may be re-coated at considerable cost saving.

Re-coated routers look and perform as new.

Re-coating involves, removing the worn diamond coating and replacing it with a new diamond deposit.

DIAMOND COATED EDGE FORMING ROUTERS
